UI/UX Designer

Sydney DeBoer

Career Objective

Enthusiatic pre-professional with a passion for UI/UX design with a degree in Computer Graphics Technology. Seeking opportunities to grow as a designer by learning through collaboration and hands-on experience. I would love a chance to expand my skillset in a team-oriented environment.

Education

Computer Graphics Technology
Aug 2013 – May 2022

Bachelor of Science

Purdue University Northwest

Projects

Implementing Personalization Features into Spotify

I spent my senior year of college working on this capstone project. One semester was spent conducting research, establishing a problem statement, and writing up a project proposal. My final semester was spent conducting a survey and user interviews, creating personas, and creating an interactive prototype with a solution to the problems verified by users.

The Region Explorer Mobile Application

I was a team leader for this semester long project in my User Experience II course. We worked alongside the mayor of Crown Point, Indiana, to create a mobile application that would help promote local businesses and events. This project was heavily influenced by the effect COVID-19 had on small businesses.

YOUPUB: An E Publishing Website

This was the capstone project for my User Interface Design I course. The goal was to create a self-publishing platform for authors or anyone to publish their work. Specific pages needed to be included, such as a layout editor page, a cover editor page, and an illustration editor page. The solution was a high fidelity mockup created in Adobe Photoshop.
